- Approval is requested for the minutes from the February 22nd, 2023 meeting as drafted - Approved.

Agenda:
- Ongoing tracking [spreadsheet](#) of specifications progressing through the [JESP](#) version [lifecycle](#)
- Ongoing work on and resolve Specification Committee's process enhancements items including those identified in the Jakarta EE 10 retrospective:
  - Issues with the "enhancement" label are [here](#)

  - Enhancement labeled issues in a project board is [here](#)
  See the issues in the board for updates
- Add the Jakarta EE Compatible Logo to the Platform and Profile pages [Wayne]
  Wayne shared a mock up of the Platform specification page that included the Jakarta EE
  See https://github.com/jakartaee/specifications/pull/596/files
  Compatible products logo along with language to qualify the that implementations are eligible to use the logo provided the required criteria are met.
  Ed wanted it to be clear that an implementation can i) be certified compatible by filing a CCR, and also ii) use the compatibility logo provided they meet the criteria
  Wayne to further consider the wording that accompanies the logo the Platform, Web and Core profile spec pages
- Follow-up on two topics from February 8th and 22nd meetings:
  - Optional features approved resolution: "An individual specification can have optional features, however when a component specification is included in the

Platform and Web Profile, and Core Profile an optional feature must be explicitly declared as required, otherwise it is not required. This requirement is noted in the Platform specification."
Action: Create the issues of what needs to be done including a draft of the Jakarta EE semantic versioning model [Scott Stark]
Scott was not on the call on the 22nd, Paul followed up with him with an email.
